## Resumo

FullStack Developer with 1+ yr of work experience

I have designed and implemented systems so feel free to take a look at my personal website and GitHub repositories

My work is focused on deliver lean digital solutions where I help design, develop and validate distributed systems in many stacks in ReactJS, JS, Python, R shiny, GCP, PostgreSQL and RPA automations with UiPath and other personal projects in Angular, Spring Boot, Java, NodeJS, Bootstrap, SCSS, SQL, JPQL, Firebase, MongoDB, MySQL where I focused on REST-API and SOLID, MVC principles

Experienced with Data Analysis and Data Science (PowerBI | DataStudio) with Python and R for Machine Learning (Shiny, (pandas, numpy, seaborn, matplotlib, scikitlearn, Random Forest, LM, Decision Tree)

I have several work time with software's for audio, video and canvas Back in the days I was responsible for the creation and management of digital advertising campaigns (facebook ads and google ads) and lead management
